

Aquaculture Dialogues

Jay Ritchlin, on behalf of the Salmon Aquaculture Dialogue Steering Committee

March 12, 2009

Goal of the Aquaculture Dialogues

Create standards for environmentally and socially responsible aquaculture

Why create standards?

Minimize aquaculture's impact on:

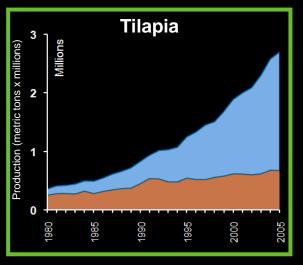

- environment
- society

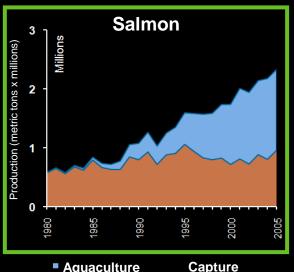

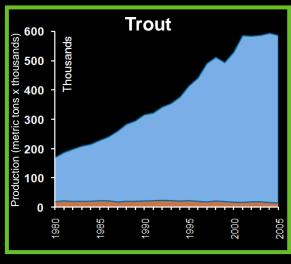

Use standards to transform aquaculture

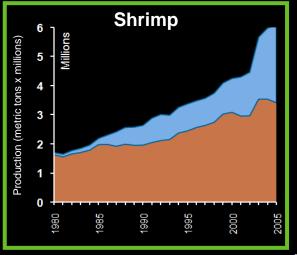

- Certify products
- Benchmark other standards
- Incorporate into government programs
- Create foundation for buyer and investment screens

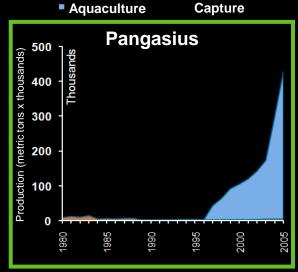

Standards to be created for 12 species

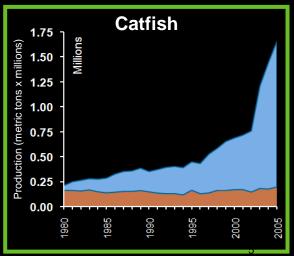

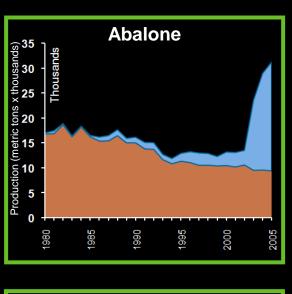

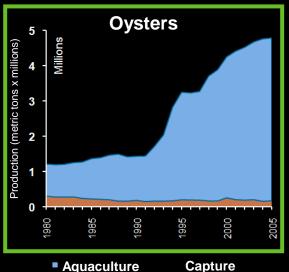

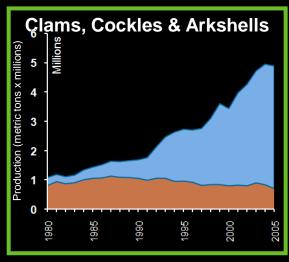

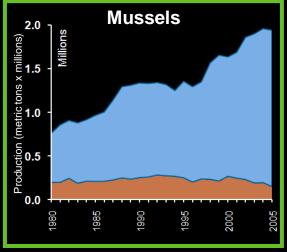

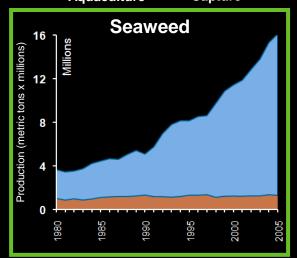

Standards to be created for 12 species

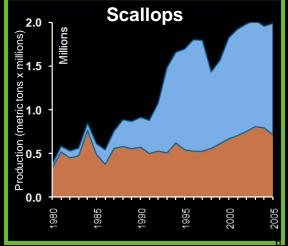

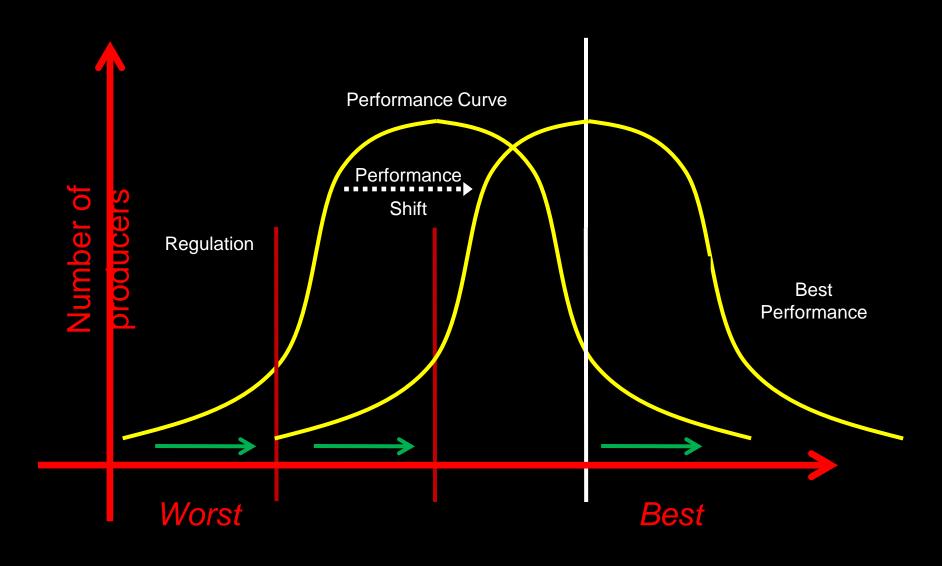

Salmon Aquaculture Dialogue

Canadian Aquaculture Industry Alliance, Coastal Alliance for Aquaculture Reform, Fundación Terram, Marine Harvest, Norwegian Seafood Federation, Pew Environment Group, SalmonChile,, Skretting, WWF

Goal of the Salmon Aquaculture Dialogue

The goal of the Dialogue is to credibly develop and support the implementation of measurable, performance-based standards that minimize or eliminate the key environmental and social impacts of salmon farming, while permitting the industry to remain economically viable.

Standards will encourage innovation

Performance

Dialogue Process

- Multi-stakeholder
- Consensus oriented
- Transparent
- Based on sound science
- Performance-based
- Measurable standards
- ISEAL compliant

Dialogues are open to everybody

2-6 meetings/year/species

30-100 people at each meeting

 Key stakeholders: NGOs, academics, producers, buyers, government

Participation at many levels

- Attend Dialogue meetings
- Do not attend but provide input
- Join a technical working group
- Join an advisory group
- Coordinate the Dialogue
- Serve as a steering committee member

The Dialogue Steering Committee

- Multi stakeholder Steering Committee (SC).
- All SC decisions are made by consensus, with an agreed upon fall back voting protocol.
- The SC aims to move the Dialogue forward while incorporating ideas, issues, and concerns from the full Dialogue
- Relevant documents available on the web

Dialogues are transparent

All meeting documents posted on the web

Invitations sent to key stakeholders

Meeting notices in trade publications

Dialogues have a roadmap

- 6 8 key impacts identified
- Goals/objectives approved

Dialogues have a roadmap

- Stakeholders propose criteria
- Technical working groups or stakeholders propose farm-level indicators and standards
- Two 60-day public comment periods are held
- Steering Committee finalizes full suite

Key impacts

- 1. Benthic impacts and siting
- 2. Chemical inputs
- 3. Disease and parasites
- 4. Escapes
- 5. Feed
- 6. Nutrient loading and carrying capacity
- 7. Social Issues

State of Information Reports

Created by Technical Working Group

 Create a common understanding for building consensus among participants

 Lay the basis for drafting of principles, criteria, indicators and standards

Technical Working Groups (TWG)

- Reports were commissioned on the key impact areas
- TWGs and ToRs formed in an iterative and participatory process

Technical Working Groups

 Five reports completed and available on website

Each report presented at a full Dialogue meeting

Public comments solicited

How do we define "standard?"

- Impact: The problem we want to minimize
- Principle: The guiding principle for addressing the impact
- Criteria: The area to focus on to address the impact
- Indicator: What to measure in order to determine the extent of the impact
- Standard: The number and/or performance level to reach to determine if the impact is being minimized

Principles

Standards

Moving towards standards

- Principles
 - Two rounds of revisions and public comment

- Criteria
 - Drafted, discussed, revised, and posted for public comment

This Meeting: Goals

- Develop shared understanding of the SAD standards development process, including work done to date.
- Present and discuss disease working group reports and findings, and clarify implications for SAD standards.
- Collect feedback on revised draft criteria for use by Steering Committee in development of final draft criteria.

Suggested Ground Rules (what we can ask of each other)

Encourage sharing of views, opinions, ideas and options

"Listen" respectfully

Seek to understand rather than assuming motives

Suggested Ground Rules (what we can ask of each other)

Stay on track with the agenda

Express your own views rather than speaking for others

 Strive to bridge gaps in understanding and seek creative resolutions

Limit cell phones and email to break times

Thank You
